EXAMINER'S AMENDMENT & REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

An examiner's amendment to the record appears below.

In the claims:

Cancel claims 9-11 and 13-37.

2. The following is an examiner's statement of reasons for allowance: the declaration filed 2/18/05 under 37 CFR 1.131 is persuasive in establishing that the inventors of the instant Application had possession of the claimed inventions prior to March 2, 2000. In addition, the instant nucleic acids possess a specific utility in that they are upregulated in rats that are diet-induced obese (DIO), similar to other transcripts whose encoded proteins are known or thought to be involved in feeding behavior such as those transcripts for leptin and SOCS3 (a negative-feedback regulator of leptin signaling involved in leptin-resistance in obesity), but not for transcripts such as those for the structural protein β -actin, the protease cathepsin, or the enzyme COX1, as compared to control rats. Additionally, the instant nucleic acids possess a substantial utility in that these measurements of transcript regulation were performed in the hypothalamus, a brain region well-known in the art for its involvement in mammalian feeding behavior, thereby providing guidance to the practitioner as to where and how to practice the instant invention as a neurobiological indicator of the DIO state.
